About CORE Security

CORE Security is the leading provider of predictive security intelligence solutions for enterprises and government organizations. We help more than 1,400 customers worldwide preempt critical security threats throughout their IT environments, and communicate the risk the threats pose to the business. Our patented, proven, award-winning enterprise solutions are backed by more than 15 years of applied expertise from CoreLabs, the company’s innovative security research center.

About CORE Insight Enterprise

CORE Insight™ Enterprise is the first security intelligence solution that enables organizations to continuously and proactively assess their business risks. CORE Insight empowers executives to make informed choices for improving security, optimizing budgets, and increasing operational efficiency.

The Insight solution integrates seamlessly with existing IT environments, pinpointing imminent risks without disrupting business processes. By combining advanced simulation with real-world testing, CORE Insight provides actionable information otherwise overlooked amidst volumes of security data. Customers gain unprecedented intelligence regarding their organization’s real-time security posture, while connecting real risks to specific operational and business goals.

- **Predict security threats**: Proactively identify exposures throughout your environment and understand how they impact your business
- **Validate critical vulnerabilities**: Increase efficiency, pinpointing critical threats previously lost in disparate data feeds
- **Communicate risk clearly and effectively**: Present risk analytics in the context of key assets, operational areas, compliance mandates, and business objectives
- **Pinpoint risks arising from change**: Identify critical threats as changes (e.g., new machines, policies or patches) are made to your environment

Solution Benefits

CORE Insight equips security and compliance teams with the actionable information they need to immediately address exposures and secure critical assets. Insight offers deep visibility into your true information security standing, delivering metrics that detail security effectiveness and prove compliance with key regulations.

- Proactively identify, validate and prioritize risks
- Assess and visualize risk in the context of specific operational and business goals
- Verify compliance with federal mandates, industry regulations and internal policies
- Demonstrate the risk implications of corporate policy exceptions
- Repeat targeted assessments to verify remediation effectiveness
About RSA

RSA, the Security Division of EMC, is the premier provider of security solutions for business acceleration, helping the world’s leading organizations succeed by solving their most complex and sensitive security challenges. RSA’s information-centric approach to security guards the integrity and confidentiality of information throughout its lifecycle - no matter where it moves, who accesses it or how it is used.

RSA offers industry-leading solutions in identity assurance & access control, data loss prevention & encryption, compliance & security information management and fraud protection. These solutions bring trust to millions of user identities, the transactions that they perform, and the data that is generated. For more information, please visit www.RSA.com and www.EMC.com.
