

# MOBILE RESET

**4 WAYS MOBILE RESET CAN  
CHANGE YOUR BUSINESS**

The background image shows two men in business suits sitting at a table. The man on the left is wearing a dark blue suit, a light blue striped shirt, and a dark tie. The man on the right is wearing a dark blue suit, a white shirt, and a blue and white striped tie. They are both looking down at documents on the table. A white cup is visible on the right side of the table. A semi-transparent purple rectangle is overlaid on the left side of the image, containing white text.

With Mobile Reset authentication you can combine a username and password with the one thing users always carry with them – their mobile phones. Quickly deploy multi-factor authentication via a full suite of out-of-band channels including device login, fingerprint, SMS, telephony, One-time Passwords and PUSH notifications to ensure that access is controlled securely.

A woman with dark hair, wearing a black sleeveless top with white polka dots, is looking down at a laptop screen. The background is a plain wall with a yellow square and a brown square. The text 'SELF SERVICE' is overlaid in large yellow letters on the left side of the image.

# SELF SERVICE

Allows users to manage their password, reset when needed and unlock their accounts easily using their mobile devices. Users have the flexibility to access and reset their passwords or unlock their accounts from anywhere at their convenience.

# SAVE RESOURCES

Each password reset call into your help desk has a cost. A strong self-service password management solution will achieve a rapid ROI by reducing service call volume up to 80%.

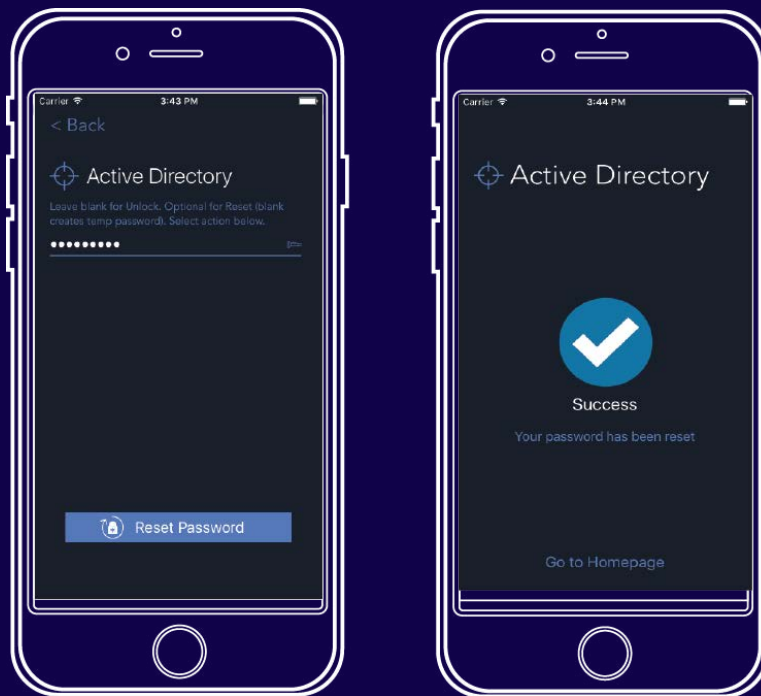

Gives you to the ability to report on enrolled users and details on their account unlocks and resets. A searchable audit trail can be created all password reset interactions to prove compliance.

# INTUITIVE REPORTING

---

“Core Mobile Reset works with both iOS and Android operating systems and gives users the ability to passwords and/or unlock accounts from the mobile app or via SMS text”

Using advanced authentication, users can securely reset their password by fingerprint and/or answering a personal verification question through a mobile app, SMS text or voice biometrics.

A close-up photograph of a person's hands. The right hand is holding a silver smartphone, while the left hand is positioned over a laptop keyboard. The person is wearing a light blue button-down shirt. The background is bright and out of focus. The text 'SECURE AUTHENTICATION' is overlaid in large, bold, orange letters at the bottom of the image.

# **SECURE AUTHENTICATION**
