# Core PAM
## Privileged Access Management

## Benefits

- **Faster deployment** — installs on global networks in days instead of months to lower your cost of ownership and lower IT risk.

- **Auto-Discovery** — automatically tracks, secures and reports your privileged identities, systems, and account interdependencies with minimal manual intervention.

- **Easier Integration** — Core PAM works with your helpdesk software, SIEM, multi-factor authentication, and more.

- **Platform Architecture** — using industry standard Web services architecture, Core PAM integrates with any Identity and Access Management system to promote quick adoption, providing users with missing IAM capabilities through a familiar interface.

- **Simpler Maintenance** — built on open and documented databases, full upgrades are included in your cost of support and are installed quickly by your own IT staff.

## Discover, Control and Monitor Privileged Accounts and their Activity

Every organization has elevated non-restrictive access to critical IT assets also known as privileged access. These privileged accounts are important for any business to get their jobs done however, they also require continuous monitoring and auditing. With constrained, manual resources, it is not always possible to have clear visibility into these accounts. Thus, to gain the much needed visibility and access rights of these accounts, organizations need a complete holistic solution enabling them to be in control of their privileged account activities.

Core PAM allows you to do all this. It enables you to automatically discover, provide access control, secure and audit privileged activity by giving you enhanced visibility, continuous autodiscovery, much needed automation and encrypted password data store. With Core PAM, you are in control of your organization's privileged account activity, which means more efficiency, better audits and improved security posture.

| System Name | Account Type | Account Name | | Last Change Time |
|---|---|---|---|---|
| shieldops.local | Windows Account | ironman | | 4/18/2016 3:51:35 PM |
| DEMOAAD-DS9 | Azure Active Directory Account | Spock.Schn-Tgai@cloudadminthecloudcreds.onmicrosoft.com | | 2/26/2016 7:32:28 PM |
| shieldops.local | Windows Account | captainamerica | | 2/25/2016 3:49:26 PM |

## Increase Compliance and Reduce Threat Surface

Due to the frequency and seriousness of breaches caused by privileged account misuse, compliance requirements have increased. This means that to be compliant with SOX, HIPPA, PCI-DSS, FISMA and other mandates, you need an automated, comprehensive credentials management process for privileged accounts. Core PAM helps organizations achieve compliance through its strategic comprehensive offering that's quick to deploy and easy to maintain.

## Automate and Increase Efficiency

Automating the credentials management process for privileged accounts can help improve the efficiency of IT operations. With Core PAM, you can automatically track, secure and report your privileged identities, systems and account interdependencies with minimal manual intervention. With clear visibility and control on these privileged accounts, you can now be more efficient and focus on other business critical activities.

## Faster Deployment

You want your selected solution to deploy quickly so that you can start strategizing and securing your organization's privileged access. While most solutions can take months to truly deploy, Core PAM installs quickly on global networks with minimal effort on your part, hence lower cost of ownership.

## Easy to Integrate and Simple to Maintain

IT applications exists in silos and thus you need a solution that can integrate with your other business critical solutions. Moreover, you need something that's easy to maintain and support so that you are spending more time utilizing its benefits and less time supporting it. Core PAM makes it easy for you to integrate with your help desk software, SIEM, multi-factor authentication analytics and is easy to maintain. It's built on open and documented databases with full upgrades built into your support cost and can be quickly installed by your own IT staff.

Core PAM allows you to discover and supervise privileged account access to ensure compliance, efficiency, visibility and superior security. To learn more about Core PAM, its specifications and how it could work in your environment, schedule a demo or contact us at info@coresecurity.com or (678) 304-4500.

**ABOUT CORE SECURITY**

Core Security provides companies with the security insight they need to know who, how, and what is vulnerable in their organization. The company's threat-aware, identity & access, network security, and vulnerability management solutions provide actionable insight and context needed to manage security risks across the enterprise. This shared insight gives customers a comprehensive view of their security posture to make better security remediation decisions. Better insight allows organizations to prioritize their efforts to protect critical assets, take action sooner to mitigate access risk, and react faster if a breach does occur.

Core Security is headquartered in the USA with offices and operations in South America, Europe, Middle East and Asia. To learn more, contact Core Security at (678) 304-4500 or info@coresecurity.com
